

Huawei s advanced second-wheel battery PACK

Overview

What is Huawei's new EV battery?

Smartphone giant and EV investor Huawei has challenged CATL and BYD's supremacy by inventing a pioneering new battery that blends an incredible range of up to 3000km with a charging time of just five minutes.

Does Huawei make batteries?

Even though Huawei doesn't manufacture batteries, the company is putting plenty of R&D resources into developing a new solid-state battery tech. The newest patent reveals a battery pack that can go for 1,860 miles away from the plug and fully charge in just five minutes. This is perhaps one of the craziest technologies we've heard so far.

Will Huawei make EV batteries?

With the patent filed, it's not known what the tech giant plans next as Huawei does not currently have any manufacturing facilities that are suitable for mass-producing batteries for the car industry. Its involvement in the EV industry is as technology supplier and partner to several Chinese makers rather than building its own vehicles.

What is Huawei giant whale battery?

It can also actively communicate driving intentions and pedestrian safety. Huawei Giant Whale Battery 2.0 is the industry's first 800V high-voltage extended range 6C battery pack, using an ultra-fast charging cell system that takes only 10.5 minutes to charge the state of charge from 10% to 80%.
