Hybrid battery cabinet replacement

Overview

Can a hybrid battery be replaced?

Hybrid batteries can be replaced with a brand new one or a high-quality remanufactured one. For those looking for a more cost-effective solution, hybrid owners can repair their hybrid batteries with a conversion kit. Nuvant Systems Inc offers the highest quality battery replacement and repair solutions for both options.

Are hybrid batteries remanufactured?

At Nuvant Systems Inc, we offer both remanufactured and new hybrid batteries. In addition to remanufactured batteries, we provide new hybrid batteries in the form of 'conversion kits' or new aftermarket modules and batteries to replace failed or degraded modules in a battery (pack removal and assembly required).

What is a hybrid battery conversion kit?

A hybrid battery conversion kit contains a set of aftermarket hybrid battery replacement modules specific to your vehicle. These cylindrical or prismatic modules can be installed into an existing hybrid battery, replacing failed or degraded OEM modules. The conversion kit and aftermarket modules are built to the same specifications and performance as new OEM.

Do hybrid batteries come with a warranty?

All of our reconditioned, new module, and OE hybrid battery products come standard with comprehensive warranty. Eliminate the hassle of finding a qualified hybrid battery installer. Whether you're at home or work, we come to you in select markets! *Restrictions apply – call for details. View our service area. Get back on the road, today.
