

# **I want to install a solar power system**

## Overview

---

### How to install solar panels?

The first step in solar panel installation is fixing the mounting structure to support the panels. The whole mounting structure must be tilted and have an angle between 15 to 20 degrees to have maximum sunlight exposure. For countries in the Northern Hemisphere, the best direction to face solar panels is south because it gets maximum sunlight.

### Can you install solar panels on your own?

Installing solar panels on your own can be challenging but is certainly doable with the right tools, preparation, and research. DIY solar installation requires knowledge of electrical systems, roofing safety, and the installation process.

### Should I install a solar power system?

Your solar power system can be: For urban homeowners, an on-grid solar panel for home system is often the most cost-effective. Professional installation ensures long-term safety and performance. A certified installer will: Always request an AMC (Annual Maintenance Contract) and ensure post-installation support.

### Is DIY solar installation a good idea?

This type of setup usually involves purchasing a solar kit that contains the essential components, including solar panels, an inverter, and racking systems. DIY solar installation is an appealing option for those who want to save on labor costs and take a hands-on approach to energy independence. Is It Difficult to Install Solar Panels by Yourself?
