India's Bulk Procurement of 1MWh Solar Storage Container

Overview

What is India's solar-plus-storage model?

This tender is a step toward India's broader vision of achieving 24x7 clean, dispatchable power and bolstering grid reliability through large-scale energy storage integration. The solar-plus-storage model supports load balancing, peak demand management, and smoother renewable energy penetration into the grid.

Where is India's first large-scale solar-plus-storage site?

Chhattisgarh, India. One of the country's first large-scale solar-plus-storage sites, inaugurated in February 2024 with SECI playing an instrumental role. Image: Press Information Bureau of India (PIB). India's renewable energy-adjacent battery storage sector rolls on, with new procurement and regulatory moves from state-run agencies SECI and CEA.

Is India ready for solar-plus-storage tenders?

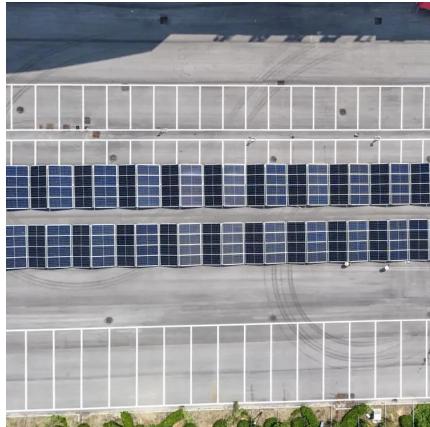

Despite this success, it remains early days for India's solar-plus-storage tenders—as shown in Debmalya Sen from IESA's chart below, only 200MW of solar PV and 200MWh of battery storage has been put into operation so far through Solar+BESS tendering.

Why did India issue a 2 GW solar tender with co-located battery storage?

A 2 GW solar tender with co-located 1 GW/4 GWh battery storage was issued by Solar Energy Corporation of India to support India's 2030 grid reliability goals. Link copied!Copy failed! Each project must pair 1 MW solar with 0.5 GW/2 GWh battery storage, charged solely from solar at one co-located site. Image Credit/Source: TheOtherKev/ Pixabay
