# Indonesia Container Energy Storage Station BESS

## Overview

---

Indonesia's state-owned utility and battery producer have launched a 5MW battery energy storage system (BESS) pilot project as it seeks to move away from diesel-generated power. Will Indonesia build a battery energy storage system?

JAKARTA, March 18 (Xinhua) -- Indonesia's state-owned electricity company PT PLN and its subsidiaries have collaborated with the Indonesia Battery Corporation (IBC) to build a battery energy storage system (BESS) with a capacity of 5 Megawatts (MW) this year.

Why is Indonesia launching a 5MW battery energy storage system?

Indonesia's state-owned utility and battery producer have launched a 5MW battery energy storage system (BESS) pilot project as it seeks to move away from diesel-generated power.

What is battery energy storage systems (Bess)?

Battery Energy Storage Systems address multiple technical requirements including grid stability, renewable intermittency mitigation, and energy access in geographically dispersed regions. Market analysis indicates substantial growth trajectory. BESS sector valuation demonstrates projected threefold increase over six-year period 2.

Does Indonesia have a grid-connected energy storage system?

There, the global system integrator Fluence recently turned on a 20MW/20MWh grid-connected BESS as part of a 1,000MW portfolio in development and construction for power company SMC Global Power. Indonesia's current pipeline of energy storage projects is mostly pumped hydro, totalling 4,063MW according to IHS Markit.
