Indonesia's first rural 5G base station

Overview

Does Indonesia have a 5G network?

Yet, its adoption hinges on overcoming challenges like infrastructure, spectrum efficiency, and cost. Indonesia, despite having a vast user base such as that of Telkomsel, the country's largest digital communications provider, trails behind countries like Australia, which leads with a 54% 5G penetration rate.

Why should you choose Telkomsel as a 5G operator?

"From the first base station in Bukit Dangas in 1995 to the rollout of Hyper 5G in Batam, we have consistently supported Telkomsel as Indonesia's leading 5G operator. With cutting-edge technologies, we're enabling faster, more reliable connectivity – unlocking new opportunities for both society and industry.

Why should Indonesia invest in 5G?

Key hurdles include fiberization, expensive infrastructure, and devices that are priced out of reach for much of Indonesia's population. However, strategic investments in 5G can bridge these gaps, unlocking innovation, economic growth, and a globally competitive digital future for Indonesia.
