

# Intelligent Off-Grid Solar Containerized Drone Station

## Overview

---

What is a boxpower solarcontainer?

BoxPower's flagship SolarContainer is a fully integrated microgrid-in-a-box that combines solar PV, battery storage, and intelligent inverters, with optional backup generation. Designed for reliability and ease of deployment, the SolarContainer is ideal for powering critical infrastructure, remote facilities, and commercial operations.

What is 'off-grid optimized' recharging?

The second strategy is 'off-grid optimized', which demonstrates the extent to which the number of charging stations can be reduced by delaying the en-route recharging per UAV to the extent possible (maximum >20% SoC) to combine more recharging sessions per station as compared to requiring extra charging stations.

What is a hybrid microgrid?

BoxPower's hybrid microgrid technology combines solar, battery, and backup power into a modular platform designed for remote and resilient energy.

Can building-integrated photovoltaics and UAV recharging stations reduce energy consumption?

Upgrading these building envelopes by deploying building-integrated photovoltaics (BIPV) and allocating UAV recharging stations on their roofs would represent a dual green solution. The environmental benefits of reducing energy consumption in upgraded buildings are coupled with generating clean electricity required for the UAV charging functions.
