

# Irish school uses 500kW photovoltaic container

## Overview

---

Could a 'schools photovoltaic programme' make Ireland's public spaces more sustainable?

The “Schools Photovoltaic Programme” could be an important step in making Ireland’s public spaces more sustainable. Currently, only 5% of primary schools and 10% of post-primary schools in the country have solar power – which means that most schools are relying on fossil-fuel-generated sources of heat and electricity.

What is the schools photovoltaic (PV) scheme?

The first phase of the Schools Photovoltaic (PV) Programme was launched in November 2023. The scheme provides eligible schools with up to 6 kilowatts peak of roof-mounted solar photovoltaic (PV) installations on their roofs, which equates to approximately 14 solar panels.

Are Irish schools relying on solar power?

Currently, only 5% of primary schools and 10% of post-primary schools in the country have solar power – which means that most schools are relying on fossil-fuel-generated sources of heat and electricity. That’s had eco-aware Irish students up in arms for a while now.

How many solar panels can a school install?

The scheme provides eligible schools with up to 6 kilowatts peak of roof-mounted solar photovoltaic (PV) installations, which equates to approximately 14 solar panels. More than 1,100 schools have been approved for solar panels since the launch of the programme last year.
