

Is it safe to use outdoor power in Panama

Overview

Should I use a surge protector when charging my devices in Panama?

Always use a surge protector when charging your devices in Panama to prevent damage from power fluctuations. When in Panama, avoid using high-wattage devices (e.g., hair dryers, curling irons, and straighteners) without a proper voltage converter, as they can cause damage to your devices or the electrical system.

Do I need a power adapter in Panama?

Since the sockets in Panama are the same as the ones in the United States, you won't need a US-to-Panama power adapter for your trip there. But, if you bring something like this universal power adapter, you'll have two extra USB ports for charging any extra devices you have, which makes things pretty convenient if you ask us.

Are there power outages in Panama?

In general, though, power outages are rare. Half of Panama's electricity is generated through hydropower. Panama also boasts the largest wind farm in Central America, with over 100 wind turbines generating roughly 7% of the country's electricity needs.

Do I need a power converter in Panama?

Whether or not you need a power converter in Panama depends on the voltage and frequency requirements of your electronic devices. Panama uses a standard voltage of 110 volts and a frequency of 60 Hertz. If your devices are designed to operate on 110 volts and 60 Hertz, you will not need a converter.
