

Jerusalem Energy Storage Integrated Battery Enterprise

Overview

How many mw can a battery store in Israel?

Israeli renewable energy developer Enlight has won grid connection rights for 300 MW of battery storage capacity in a national tender, enabling the construction of systems that can store between 1,300 and 1,900 MWh of energy.

How many high-voltage energy storage projects are there in Israel?

To support this transition, Israeli network operator Nega Company ran a tender in July 2024 which attracted offers from 11 bidders for the construction and operation of 29 high-voltage energy storage projects, totaling approximately 4 GW with each project offering a storage capacity for at least four hours.

Does Enlight have a grid connection in Israel?

Enlight has secured a grid connection for 300 MW via two projects in Israel, which will add between 1,300 to 1,900 MWh of energy storage to the grid.

How much does it cost to build a storage facility in Israel?

The two facilities – Neot Smadar and Ohad in southern Israel – will operate under regulated tariffs for five years before gaining merchant market access. The projects must begin operations by 2028, with construction costs estimated at \$210-250 million. This latest award accounts for 20% of the capacity allocated in Israel's first storage tender.
