

Kuwait power generation container house

Overview

How much renewable power will Kuwait have by 2035?

Our current projections estimate renewable capacity will only reach 3.3 gigawatts (GW) by 2030, just 7% of Kuwait's power generation, with a renewables share of 15% by 2035, a more realistic target. By that time, renewable capacity is expected to exceed 11 GW, accounting for around 20% of Kuwait's power generation.

Will Kuwait's gas production increase by 77 terawatt-hours (TWh) by 2030?

Rystad Energy's analysis indicates that Kuwaiti gas power generation is set to increase by 17% to 77 terawatt-hours (TWh) by 2030. As a result, gas production is expected to rise by 38%, while overall gas demand is forecast to increase by 30% in the next five years.

What percentage of Kuwait's power is supplied by Mitsubishi Power?

As an instrumental power supplier for the country's energy sector, Mitsubishi Power provides almost half (43%) of Kuwait's power supply. Our technologies are installed in many major power plants, including the 2.4GW Doha West, 2.4GW Sabiya, and the 2.5GW Az-Zour South 0.5GW Shuaiba South B.

How is Kuwait reducing oil consumption?

Kuwait is focused on reducing domestic oil consumption by gradually replacing oil with gas in its power generation mix, which currently accounts for 40% of its energy needs. The main goal is to free up more crude for export, as oil sales remain the backbone of Kuwait's economy and provide the bulk of its government revenue.
