

Large-capacity solar container lithium battery energy storage power supply

Overview

What is the containerized lithium battery energy storage system?

The containerized lithium battery energy storage system is based on a 40-foot standard container, and the lithium iron phosphate battery system, PCS, BMS, EMS, air conditioning system, fire protection system, power distribution system, etc. are gathered in a special box to achieve high integration.

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

What is a containerized energy storage system?

The Containerized energy storage system refers to large lithium energy storage systems installed in sturdy, portable shipping containers, which usually range from 5ft, 10ft, 20ft, and 40ft, and mainly focus on 50Kwh to 10Mwh.

What is lithium-sulfur batteries for large-scale energy storage?

The Lithium-Sulfur Batteries for Large-Scale Energy Storage project aimed to develop advanced lithium-sulfur batteries for renewable energy storage with high-energy density, extended service life and operational safety.
