

Marseille wind and solar energy storage project

Overview

How many wind turbines will Marseille Fos produce a year?

The Port of Marseille Fos hopes to have the infrastructure in place by 2028 to ensure the production of 25 wind turbines a year, and 50 floats could be produced annually by combining the capacities of the new facility on the DEOS site with those of Eiffage Métal.

Where is Provence Grand large floating offshore wind pilot project located?

The Provence Grand Large floating offshore wind pilot project is situated 17 kilometers off the coast of Port-Saint-Louis-du-Rhône. Exciting projects will be unveiled at FOWT 2024.

Are offshore wind turbines a good investment for the future?

Although their initial cost is higher, they produce 60% more electricity, making them a promising investment for the future. On 4 February 2024, the Port of Marseille Fos announced that it was investing €550 million to diversify its activities into offshore wind energy in the Fos-sur-Mer industrial port zone.

How many offshore wind farms are there in France?

To date, France has just one offshore wind farm in full electric production that is located in Saint-Nazaire, but a series of other offshore facilities are currently being planned or are under construction.
