

Maximum capacity of a single industrial and commercial energy storage cabinet

Overview

What is energy storage system?

All-in-one, high-performance energy storage system for various industrial and commercial applications. Highly suitable for all kinds of outdoor applications such as EV charging stations, industrial parks, commercial areas, housing communities, micro-grids, solar farms, and more.

What is a lihub energy storage system?

The LiHub has a standard one-cabinet-one-system design, each system is completely independently controlled. Multiple cabinets can be connected in parallel to expand the size of the energy storage system, enabling flexible configurations. All-in-one, high-performance energy storage system for various industrial and commercial applications.

What are the applications of energy storage system?

All-in-one, high-performance energy storage system for various industrial and commercial applications. Highly suitable for all kinds of outdoor applications such as EV charging stations, industrial parks, commercial areas, housing communities, micro-grids, solar farms, peak shaving, demand charge management, grid expansion and more.

What is lihub all-in-one energy storage system?

LiHub All-in-One Industrial and Commercial Energy Storage System is a beautifully designed, turn-key solution energy storage system. Within the IP54 protected cabinet consists of built-in energy storage batteries, PCS inverter, BMS, air-conditioning units, and double layer fire protection system.
