Medical emergency communication command base station

Overview

What is a mobile command center?

A mobile command center is a mission critical vehicle that is equipped for incident response in the field. This mobile command trailer, bus or truck operates as a central office — equipped with communications technology including satellite dishes, cellular routers and Wi-Fi connections to ensure connectivity anywhere.

What is a Mobile Emergency Response Center?

Also known as a mobile emergency response center, the unit provides emergency communications that help better control a critical situation in a range of emergencies.

What is a key feature of a mobile command center's base?

Every mobile command center stands on a robust foundation, either a heavy-duty commercial chassis or a custom trailer platform. This base choice guarantees strength and versatility, key for diverse operational environments.

What is a mobile command unit?

Mobile command units are equipped with generators to keep power running along with satellite dishes to stay connected to emergency teams, or even other units in the area. Digi Safe™ includes fast, reliable mobile access routers that support the full range of connectivity needs in mobile command centers.
