

Mexican outdoor wind power base station manufacturer

Overview

Where are wind turbines made in Mexico?

With a local blade factory in Tamaulipas and a concrete tower production facility in Nuevo Leon, it produces high-quality components in a highly competitive and cost-efficient manner for the local market. In addition to all this, the Group also develops projects within the country. Wind conditions in Mexico vary quite a lot.

Is wind energy the most competitive technology in Mexico?

And although the Mexican government has placed thermal energy back on the agenda, the reality shows that wind energy, together with photovoltaics (PV, solar) are the most competitive technologies. Today, Mexico has an installed capacity of more than 7 GW of onshore wind energy, and this is forecast to double by the year 2030.

Are N155 turbines a good choice in Mexico?

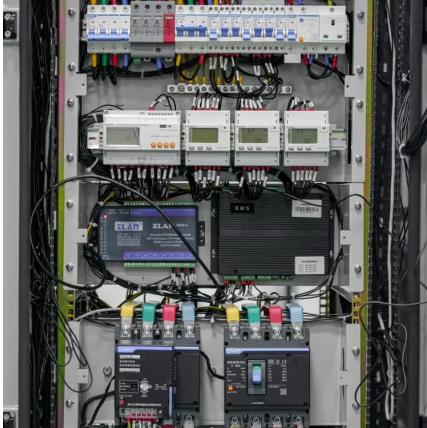

The N155 turbines cover a wide range of power modes in the 4 MW+ and 5 MW+ class and improve competitiveness in medium wind conditions. The projects in Mexico are all currently home to turbines from the AW platform, but more recently, the Delta4000 series, especially the N155/4.X and N155/5.X, has added particular sales potential within the market.

What is the biggest wind power complex in Latin America?

Oaxaca II, III and IV represent one of the biggest wind power complexes in Latin America. Three wind farms (306 MW) on the Isthmus of Tehuantepec that produce electricity equivalent to the consumption of 700,000 Mexican homes.
