

Micronesia 12v solar panel power generation

Overview

Will Pohnpei get a 5 MW solar power farm?

PEPP's proposed \$20 million 5 MW solar power farm for Pohnpei would help to establish the Federated States of Micronesia as a world trendsetter in the application of renewable energy. It would give the FSM greater energy independence.

How much does a solar project cost in Pohnpei?

After just 15 years, the entire project, capitalized at over \$20 million, will transfer, without cost, to the State of Pohnpei, providing it with many more years of free renewable energy using the best solar technology. The solar project in Pohnpei is a concept that can be replicated by other Small Island Developing States.

Will solar power help FSM achieve 70 percent renewable electricity by 2030?

New grid-connected solar generation and battery storage systems in Chuuk and Pohnpei will help FSM meet its goal of 70 percent renewable electricity by 2030, while cutting greenhouse gas emissions and insulating communities from volatile fuel prices.

Will Pohnpei slash electricity costs?

Without fanfare, PEPP launched a whirlwind of consultations with stakeholders, who swiftly coalesced around our plan to slash electricity costs to Pohnpei consumers. The project will reduce Pohnpei's carbon footprint significantly. It will also safeguard Pohnpei's energy needs for many years to come.
