Mobile charging energy storage equipment

Overview

What is rechargeable energy storage system?

Rechargeable energy storage system (RESS) means the rechargeable energy storage system that provides electric energy for electric propulsion Traction Battery System or “RESS” is any storage system for electric energy that can be recharged and can comprise of several traction Battery Packs.

What is mobile energy storage?

Mobile energy storage provides a clean alternative to diesel generators for locations with no grid connection or only a weak one. Grid congestion creates increasingly long waiting times for companies who want to increase their grid connection. Mobile energy storage is the temporary solution to keep your business running.

What is charge Qube?

With its robust, adaptable design, Charge Qube is the definitive solution for businesses looking to future-proof their energy infrastructure, reduce emissions, and embrace the benefits of sustainable energy storage and high-performance EV charging. Key Features & Configurations.

What are the different types of energy storage options?

Scalable, Modular Energy Storage: Configurations range from 150kWh to 450kWh, with daisy-chaining options for extended capacity. Energy Storage Only – Providing flexible, off-grid power solutions. CCS DC Fast Charging – Featuring dual 150kW CCS chargers, suitable for high-speed public and commercial EV charging.
