

# **Mobile energy storage container single-phase for Dutch port terminals**

## Overview

---

Does port of Rotterdam have mobile shore power?

Port of Rotterdam has run an earlier pilot with mobile shore power, “Pilot Phase A at the Parkkade” (Port of Rotterdam, 2020), in which 5 concepts of mobile shore power were tested for the low power segment (<250kW). In the current pilot, Pilot Phase B, a single technology has been tested for the higher power segment (>500kW).

Can a ship connect to a battery container at Steinweg Beatrix terminal?

Sea-going ships from the Dutch shipping company Cargow were successfully connected to moveable battery containers providing shore power at the Steinweg Beatrix Terminal in a recent pilot, the port of Rotterdam has unveiled.

How will CATL's battery technology be integrated into port logistics?

Both parties are entering into a strategic partnership to integrate CATL's battery technologies into the Dutch company's port logistics. For example, the Chinese group will provide batteries and system solutions that will be installed in container handling equipment.

What is containerized energy storage?

ABB's containerized energy storage solution is a complete, self-contained battery solution for a large-scale marine energy storage. The batteries and all control, interface, and auxiliary equipment are delivered in a single shipping container for simple installation on board any vessel. How does containerized energy storage work?
