

Model of energy storage batteries imported from Rotterdam the Netherlands

Overview

Why are batteries so important in the Netherlands?

Batteries are indispensable for the energy transition. Yet the development of battery projects in the Netherlands lags behind that in other countries. This is because batteries in the Netherlands have to pay to take power from the grid.

Who is responsible for battery development in the Netherlands?

Enecogen is responsible for maintenance and operations. The EP NL and Eneco trading departments control the battery. Batteries are indispensable and acceleration is necessary. Batteries are indispensable for the energy transition. Yet the development of battery projects in the Netherlands lags behind that in other countries.

Is this the Netherlands' first homegrown battery?

Karen de Lathouder, COO Assets Eneco : “It’s fantastic that we can invest in this new battery, which is a breakthrough after years of development. At the same time, it’s a shame that this is only the Netherlands’ first homegrown battery.

Are all energy storage facilities in the Netherlands electro-chemical?

All energy storage facilities in the Netherlands are electro-chemical, with the exception of the contracted 1 MW Hydrostar underwater compressed air energy storage project in Aruba (Caribbean). Hydrostar is a Canadian company specializing in underwater compressed air energy storage technologies.
