

Nordic Energy Station Site

Overview

Who is a Nordic energy company?

The company's origins go back to 1895 and is today one of the country's largest groups. The headquarter is in Oslo, Norway. Our Norwegian operations involve direct ownership in well over 100 hydropower plants and ten wind farms, and has for more than 30 years been a significant market player in Nordic energy trading.

What are the most important energy sources for the Nordic countries?

The most important energy sources for the Nordic countries, in order of importance, are oil, renewable energy sources (mainly hydro-, geothermal and wind energy), nuclear power, coal and gas.

How does the Nordic electricity market work?

The Nordic countries operate a well-integrated electricity market through the Nord Pool power exchange. This market makes it easier to trade electricity across borders. It ensures that energy flows to high-demand areas at competitive prices.

What does Nordic Energy Research do?

Nordic Energy Research is the funding institution for energy research under the Nordic Council of Ministers – the intergovernmental body between Denmark, Finland, Iceland, Norway and Sweden.
