

Nordic solar container communication station inverter

Overview

What is a proinsener solar inverter station?

Proinsener Solar inverter stations are designed and integrated specifically for each project. It is an easily installable and compact product perfect for generating solar power on a large scale. All this allows easy and quick field connection to the medium voltage transforming station (MV), which reduces transport and installation costs.

Does Solis' skid solution work with a 1500 VDC string inverter?

Solis' Skid Solution supports larger scale projects to simplify implementation and work seamlessly with our 1500 VDC PV string inverters (250-350kW). We reduce complexity by placing all supportive architecture for your large project on a single skid.

How a photovoltaic inverter station works?

In each inverter station all of the necessary equipment is integrated to connect to the medium voltage network of the photovoltaic plant, always complying with the standards of performance and quality required according to the project and its location.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.
