

North Asia solar container battery Company Foreign Trade

Overview

Will China Export more energy products to Southeast Asia?

In the future, as global demand for clean energy continues to rise and China's new energy industry continues to gain in competitiveness, it is expected that China will export a greater volume of new energy products to Southeast Asia, although it needs also to address the risks arising from trade policy uncertainty.

Which country imports solar cells to Southeast Asia?

Thailand, Vietnam and Malaysia have been the top three importers in the region, and have also topped the global importer list for two consecutive years. For solar cells and components, China's exports to Southeast Asia grew at an annual rate of around 12.5% between 2019 and 2023 and reached RMB24.675 billion in 2023.

Is new energy construction a good investment in Southeast Asia?

New energy construction in Southeast Asia will attract considerable investment from both home and abroad. According to the ASEAN Centre for Energy, the average annual energy investment in the region may exceed USD100 billion by 2030, with as much as 79% of investments being allocated to clean energy (see Figure 2).

Does China Export photovoltaic products to Southeast Asia?

For inverters, China's exports to Southeast Asia have grown slowly, with an average annual rate of around 16.6% between 2019 and 2023, though the share of the country's total inverter exports has declined from 8.7% to 4.4%. What should be noted is that China's overall photovoltaic product exports are increasing in quantity but declining in price.
