

Norway BMS battery exchange cabinet

Overview

What is a battery management system (BMS)?

The Battery Management System (BMS) is developed to meet the highest requirements for maritime applications. The cells are monitored and logged for voltage, temperature and current. The redundant safety controller developed by KONGSBERG constantly monitors the temperature and has an independent safety shutdown.

How a battery swapping cabinet is managed by Shenrui?

Program Process — The battery operation data and the operation information of the battery swapping cabinet are uploaded to the cloud for management through the IOT module of the battery swapping cabinet Shenrui provides on-board VCU, vehicle control module, replacement battery BMS module, module and cloud platform data can be directly linked.

Who is Nordic batteries?

At Nordic Batteries we assemble and manufacture customized battery- and energy storage solutions to drive your business forward. Based on our market and technological expertise we deliver solutions powering the green shift for key industries. High energy battery module produced in Norway from norwegian battery cells.

How does the Kongsberg BMS work?

The cells are monitored and logged for voltage, temperature and current. The redundant safety controller developed by KONGSBERG constantly monitors the temperature and has an independent safety shutdown. In addition, the BMS features active balancing during cycling, for optimal energy storage and battery life.
