

# **Off-grid solar containerized low-pressure type for oil refineries in West Africa**

## Overview

---

Can solar energy systems decarbonize oil refineries?

Other studies in the literature considered coupling solar energy systems to oil refineries to decarbonize their operation. The applicability and feasibility of introducing a concentrated solar power (CSP) system to reduce partial reliance on process heaters of a crude oil refinery was studied by Danish et al.

What is a feasibility study of energy integration in grid-connected oil and gas industries?

Feasibility study of energy integration in grid-connected oil and gas industries. Considering a hybrid model of renewable energies including solar, wind, and biomass alongside a combined cycle gas power plant and grid. Examining the impact of reduced grid capacity to purchase energy from grid. Analyzing sensitivity to economic instabilities.

Can a containerized Solar System be installed off-grid?

Off-Grid Installer have the answer with a containerized solar system from 3 kw up wards. Systems are fitted in new fully fitted containers either 20 or 40 foot depending on the size required.

Can solar energy drive crude oil refineries?

Employing solar energy to drive crude oil refineries is one of the investigated pathways for using renewable energy sources to support lowering the carbon emissions and environmental impact of operating the processing of fossil-based fuels.
