

MODERNIZATION SOLAR

Price Reduction for Two-Way Charging of Solar Containers

Overview

What is two-way charging?

Two-way charging is a two-way solar tariff for residential and business solar customers. It's designed to: encourage customers to export excess energy generated at times when it's needed the most. Why do we need two-way charging?

Will I get a \$0 solar export charge in 2025?

From 1 September 2025, some customers in New South Wales and South Australia, will see a \$0 solar export charge on their bill. If we do implement a charge, we'll let impacted customers know before this happens. Can I opt into two-way charging?

Can I Opt in to solar two-way charging?

Yes, you can opt in to solar two-way charging, however you will see a \$0 solar export charge on your bill. More information about solar rates in your state.

How do we manage exporting solar energy back to the grid?

This means the way we manage exporting excess solar energy back to the grid needs to change. In 2021, the Australian Energy Market Commission (AEMC) identified we need to support the integration of rooftop solar more efficiently into the electricity grid. One solution is the introduction of two-way charging.

Price Reduction for Two-Way Charging of Solar Containers

[Full article: Smart charging with demand response and ...](#)

Jul 20, 2024 · Our results suggest charging in time periods with lower energy prices, effectively shifting mid-day charging to off-peak hours for demand response (e.g. early-day cooling), while

...

[Solar Energy Storage Container Prices in ...](#)

Jul 27, 2025 · Explore market trends, pricing, and applications for solar energy storage containers through 2025. Learn about key cost drivers, ...

[Smart charging with demand response and energy peak ...](#)

Sep 16, 2025 · To the best of our knowledge, this is the first work that presents optimization models to obtain multi-period charging and temperature management decisions for all reefers ...

[Solar two-way charging , EnergyAustralia](#)

Dec 3, 2025 · What's two-way charging? Two-way charging is a two-way solar tariff for residential and business solar customers. It's designed to: encourage customers to use the electricity ...

[Two decades of progressive cost reduction: A paradigm shift ...](#)

Dec 15, 2024 · The total electricity cost includes the total cost of electricity generation (municipality tariff costs), fixed operations and maintenance costs for the existing solar PV ...

[A Bilevel Dynamic Pricing Methodology for ...](#)

Apr 8, 2025 · The increasing penetration of electric vehicles (EVs) presents both challenges and opportunities for integrated transportation and power ...

[Solar Energy Storage Container Prices in 2025: Costs, ...](#)

Jul 27, 2025 · Explore market trends, pricing, and applications for solar energy storage containers through 2025. Learn about key cost drivers, technological advancements, and practical uses in ...

A Bilevel Dynamic Pricing Methodology for Electric Vehicle Charging

Apr 8, 2025 · The increasing penetration of electric vehicles (EVs) presents both challenges and opportunities for integrated transportation and power systems. This paper addresses the ...
