Price quote for corrosion-resistant Swedish photovoltaic containers

Overview

How much does non Xinjiang polysilicon cost?

Currently, non-Xinjiang polysilicon with traceability data generally carries a quoted premium of RMB 3-5/kg. Polysilicon prices in dollar terms are prices for polysilicon with non-China origins in dollar terms, not translated from RMB prices.

Where did photovoltaic cost data come from?

Photovoltaic cost data between 1975 and 2003 has been taken from Nemet (2009), between 2004 and 2009 from Farmer & Lafond (2016), and since 2010 from IRENA. Prices from Nemet (2009) and Farmer & Lafond (2016) have been converted to 2024 US\$ using the US GDP deflator, to account for the effects of inflation.

What are the prices stated?

The prices stated reflect the average offer prices in retail and on the European spot market (customs cleared). Our Managing Director Martin Schachinger writes a personal market commentary every month, which is published in trade journals such as pv magazine or photovoltaik, as well as on online platforms such as Solarserver or EUWID Energie.
