

Profits of solar energy storage cabinet engineering service providers

Overview

What is the demand for energy storage as a service (ESaaS)?

The demand for energy storage as a service (ESaaS) is driven by the constantly growing need for efficient power management solutions and cost-efficient battery backup power during power outages. In terms of region, Asia Pacific was the largest revenue generating market in 2024.

Do investors underestimate the value of energy storage?

While energy storage is already being deployed to support grids across major power markets, new McKinsey analysis suggests investors often underestimate the value of energy storage in their business cases.

Which service segment has the largest revenue share in 2024?

In terms of service, the customer energy management services segment accounted for the largest revenue share of 31.8% in 2024. Ancillary services is the most lucrative service segment registering the fastest growth during the forecast period.

How important are ancillary services to energy storage?

Ancillary services that stabilize the power grid typically represent 50 to 80 percent of the full storage revenue stack of energy storage assets deployed today. This is observed across multiple mature storage markets but is expected to decrease to less than 40 percent by 2030.
