# Qatar small solar energy storage

## Overview

---

Who makes solar energy in Qatar?

The state-owned group, Qatar Solar Energy, is a leading manufacturer of solar power components and last year opened the largest integrated production facility for solar energy systems in the Middle East and North Africa region. Even more recently, Qatar's Solar Technologies, took a 49% stake in German-based SolarWorld.

How many megawatts does Qatar's new solar plant produce?

The addition of 875 megawatts from these two new solar plants, along with the 800 megawatts produced by the Al Kharsaah plant that came into service in 2022, will bring Qatar's total solar energy production capacity to nearly 1,700 megawatts.

Does Qatar have solar energy?

The climate of Qatar lends itself to solar energy generation, although as a geographically small state it lacks the vast expanse of desert available for solar farms in neighbouring states.

How has Qatar improved its solar energy sector?

Since the launch of Al Kharsaah plant in 2022, with an initial capacity of 800 megawatts, Qatar rapidly enhanced its solar energy sector, doubling its capacity within just three years, which is a remarkable achievement in itself.
