

Return on investment for large-scale energy storage in Malta

Overview

Who invested in Malta energy?

CAMBRIDGE, Mass.-- (BUSINESS WIRE)--Malta Inc., a leader in long-duration energy storage, today announced that it has closed on a round of financing provided by a group of investors including Siemens Energy Ventures and Alfa Laval as well as existing shareholders Breakthrough Energy Ventures, Proman, Chevron Technology Ventures, and Piva Capital.

What is Malta's energy storage system?

Malta's grid-scale, long-duration energy storage system helps governments, utilities, and grid operators transition to low-cost, carbon free renewable energy while enhancing energy security. Storing electricity for eight hours to eight days or longer, the solution reduces CO₂ emissions and dependence on natural gas.

Why should you invest in Malta's new energy storage solution?

A vital part of Malta's new energy storage solution is heat transfer technology supplied by Alfa Laval. As both an investor and a partner in the project, Alfa Laval lends more than expertise and financial backing.

Will Malta's new energy storage system revolutionize grid-scale energy storage?

Malta's new energy storage solution has the potential to revolutionize the future of grid-scale energy storage. The system can draw electricity from the grid in times of plenty and store it for hours or days, waiting until a time of high demand before releasing the power back to the grid.
