

Romanian professional solar container lithium battery bms manufacturer

Overview

What is a battery management system (BMS)?

Why?

A Battery Management System (BMS) is an intelligent component of a battery pack responsible for advanced monitoring and management. It is the brain behind the battery and plays a critical role in its levels of safety, performance, charge rates, and longevity.

What is voltaplex BMS?

Industrial Energy Storage: Voltaplex's BMS maintains safety and longevity in backup systems and off-grid power units by monitoring high-capacity lithium-ion battery management systems with scalable, remote diagnostics.

Aerospace and Defense: Our BMS design provides rugged, high-reliability power for drones, avionics, and tactical gear.

What are smart BMS solutions?

Whether for electric vehicles, energy storage systems, or portable devices, our smart BMS solutions ensure safety, performance, and efficiency.

What is inside a voltaplex BMS battery management system?

Inside every Voltaplex BMS battery management system is a purpose-built core. This core contains microcontrollers, precision voltage sensors, temperature monitors, balancing circuits, and communication protocols tailored to you and your industry's needs.
