

# **Russian home solar power generation system**

## Overview

---

Does Russia have sufficient solar energy?

Despite the common misconception, Russia has more than enough insolation to produce solar energy. Moscow-based renewables company Unigreen Energy, which has received a government guarantee for its solar power contributions, confirms this.

Is solar energy on the verge of a major expansion in Russia?

Solar energy in Russia might be on the verge of a major expansion thanks to a government support program for renewable energy sources, industry experts told The Moscow Times.

Does Russia support renewable energy?

While Russia's support for renewables is disproportionately small compared to fossil fuel energy, climate politics in Russia is becoming more active. He expects to see changes in energy competition.

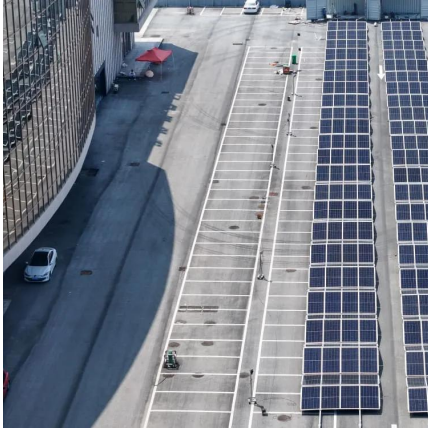

What is Russia's current share of solar power?

While the global economy gets roughly 10% of its power from wind and solar sources, in Russia, solar's share is just 0.2%. As the third-largest carbon emitter in human history, Russia faces an uphill battle in its attempts to move from fossil fuels to renewable and other sources of clean energy.
