

San Jose solar Power Generation Degradation Board

Overview

What is PGEC's San Jose solar project?

The San Jose Solar project is the latest in PGEC's portfolio of renewable energy investments, pushing forward its clean energy commitment in Luzon. Follow Power Philippines on Facebook and LinkedIn for more updates on project milestones and clean energy developments.

Does endowment of solar radiation affect the cleaning performance of PV systems?

As a result, although a high PV installed capacity has been achieved, only a small part of the installed capacity can be converted into PV power generation, which further highlights the impact of the endowment of solar radiation resources on the cleaning performance of PV systems. 3.4.

Does sjgec have a power supply agreement with SN Aboitiz Power-Magat?

SJGEC filed for a Certificate of Compliance (COC) with the Energy Regulatory Commission (ERC) on April 15. Once issued and upon the project's formal entry into the Wholesale Electricity Spot Market (WESM), its power supply agreement with SN Aboitiz Power-Magat Inc. (SNAP-MI) will take effect.

How much electricity will sjgec generate a year?

The project is expected to generate about 29 gigawatt-hours of electricity annually, enough to supply around 30,000 households and displace an estimated 20,400 tons of carbon emissions per year. SJGEC filed for a Certificate of Compliance (COC) with the Energy Regulatory Commission (ERC) on April 15.
