

San Marino Power Battery BMS Enterprise

Overview

What is a battery management system (BMS)?

We're eager to assist you in finding the perfect BMS solution to suit your specific needs. This BMS is designed for the management of 7-16 series lithium batteries, with a continuous charge and discharge current of 40A. It features an integrated design that combines functions such as data collection, management, and communication.

What is a battery management system?

A Battery Management System is the brains behind your battery pack. It's a sophisticated electronic system that ensures each individual cell within your battery operates optimally, maximizing performance, lifespan, and safety. ONEPOINTECH offers a diverse range of Battery Management Systems tailored for various applications.

What is a 7-16 battery management system (BMS)?

This BMS is designed for the management of 7-16 series lithium batteries, with a continuous charge and discharge current of 40A. It features an integrated design that combines functions such as data collection, management, and communication. It utilizes STMicroelectronics MCU and SinoWealth AFE front-end analog sampling for control.

What is a battery management software?

Battery Management Software: The BMS software is responsible for managing and controlling the various components of the BMS. It processes the data from the battery monitoring ICs, implements the battery protection and balancing algorithms, and communicates with other ECUs in the vehicle.
