# **Single-phase discount for folding containers used in wastewater treatment plants**

## Overview

---

What is a containerized wastewater treatment plant?

A containerized wastewater treatment plant is a wastewater treatment system that is fully integrated into a container. For uncomplicated and fast transportation, we use 10, 20 and 40-foot shipping containers in accordance with the international ISO standard for our KLARO container systems.

What are the advantages of a containerized wastewater treatment system?

Compact and portable: They require minimal space and can be easily transported wherever needed. A standard 20-foot container can hold a system capable of treating wastewater for dozens of people. Rapid deployment: Containerized systems are pre-assembled and ready to use upon arrival, perfect for disaster relief or temporary needs.

What is a containerized wastewater system?

Rapid deployment: Containerized systems are pre-assembled and ready to use upon arrival, perfect for disaster relief or temporary needs. Simply connect the system to the power and water supply, and it's operational. Scalable: Multiple containers can be interconnected to handle larger wastewater volumes when needed.

What is a mobile containerized wastewater treatment unit?

Mobile Containerized Wastewater Treatment Unit that can be easily transported and quickly commissioned for temporary locations. It is the fastest and most practical solution to the wastewater problem, which is one of the common problems in temporary residential areas.
