

Single supercapacitor manufacturer in Rotterdam the Netherlands

Overview

At MacroCaps, we have developed state-of-the-art supercapacitor technology capable of delivering megawatts of energy within milliseconds. What is a supercapacitor?

A supercapacitor is a double-layer capacitor that has very high capacitance but low voltage limits. Supercapacitors store more energy than electrolytic capacitors and they are rated in farads (F). Supercapacitors store electrical energy at an electrode-electrolyte interface.

Who makes supercapacitor products?

Supercapacitor products are offered by the company under its Industrial Solutions segment. The company's supercapacitor products are used in automotive, energy, and oil & gas applications. Maxwell Technologies.

What is a macrocaps supercapacitor?

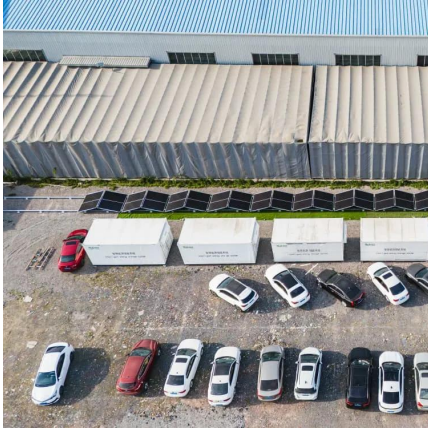

At MacroCaps, we have developed state-of-the-art supercapacitor technology capable of delivering megawatts of energy within milliseconds. Our patented architecture represents one of the most significant technological advancements in the industry in the past 50 years.

What is the global supercapacitor market?

Supercapacitors, also known as ultracapacitors, are becoming a critical component in modern energy storage solutions. According to Statistics MRC, the Global Supercapacitor Market is accounted for \$5.08 billion in 2024 and is expected to reach \$11.16 billion by 2030 growing at a CAGR of 14.0% during the forecast period.
