# Slovakia Foldable Container Off-Grid Type

## Overview

---

The Off-Grid version consists of a solarfold Container in combination with a suitable auxiliary power storage container – not hooked up to the power grid and working completely autarkically. What is a foldable solar container?

Foldable solar containers merge two mature technologies: lightweight foldable solar panels and ISO shipping containers. The systems, CDS Solar states, are standard containers with inverters, controllers, batteries, and hinged panel arrays built into them, which open while in use and fold up into a compact form to ship.

What is an off-grid Solar System?

(coming soon) The Off-Grid version consists of a solarfold Container in combination with a suitable auxiliary power storage container – not hooked up to the power grid and working completely autarkically. The system provides up to 80kW of discharge power and supplies plugged-in consumers with power – even when the sun doesn't.

What is collapsible solar container?

Collapsible solar Container hit the headlines at recent trade fairs with the latest generation of portable solar technology combining standard shipping containers and collapsible solar panels for rapid deployment, end-to-end scenario flexibility, and intelligent management systems.

Can the solarfold on-grid container be plugged into a power storage solution?

The solarfold On-Grid Container can also be plugged into a variety of power storage solutions. Each package contains a different number of solarfold Containers and the corresponding battery capacity.
