

Slovenia s Government Procurement of 5MWh Mobile Energy Storage Container

Overview

What is 5 MWh utility storage?

The 5 MWh Utility Storage represents the latest and most advanced in the Utility Storage family of products with the highest energy density and enhanced features such as a wider operating temperature range than its predecessors.

What is a mobile energy storage system?

On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions. Maximum safety utilizing the safe type of LFP battery (LiFePO₄) combined with an intelligent 3-level battery management system (BMS);.

How can a mobile energy storage system help a construction site?

Integrate solar, storage, and charging stations to provide more green and low-carbon energy. On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions.
