

# Small scale solar inverter unit price

## Overview

---

Since the price of a solar inverter can vary widely based on several factors, here is a detailed explanation of the price of solar power inverters.

Microinverters cost from \$150 to \$300 per panel. How much does a solar inverter cost?

The overall cost breakdown shows that while necessary, inverters are a relatively small part of the total investment in solar technology. After applying tax credits, the total cost to install a solar system, inverter included, comes to between \$10,600 and \$26,500. In 2023, there was a 15% drop in the price of residential systems.

How to choose a solar inverter?

The key is to align your budget, performance needs, and long-term goals with the right inverter technology. The latest 2025 solar inverter prices by top brands like Huawei, Growatt, SMA, RENYUAN, and DEYE. Compare models, features, and global trends to make the best choice for your solar project.

How much does a microinverter cost?

While they cost more than string inverters, averaging \$1.15 per watt, they offer the benefit of independent panel optimization. For a 5 kW system, the cost is approximately \$5,750. Microinverters generally come with warranties of around 25 years, which aligns with the expected lifespan of the solar panels themselves.

What is a solar inverter?

Solar inverters are designed for solar power systems and convert energy from solar panels. They include string inverters, microinverters, and hybrid inverters, catering to varying energy demands. On the other hand, Non-solar inverters are standalone devices, often used for backup power in homes or portable systems.
