What are solar inverters?

Solar inverters are devices that convert DC power to AC power. They are indispensable as many electronics work on AC, and the choice between AC or DC depends on the device's requirements.

Where to buy solar inverter?

Inverter.com online store provides a complete range of solar inverters for your photovoltaic system including on grid inverter (grid tie inverter), off grid inverter, micro inverter and solar pump inverter with lower cost. Choose inverter.com to buy your solar inverter benefit from the superior quality, best price and flexible delivery.

What is a small power inverter?

Small Inverters. Our Small Inverter category includes inverters generally ranging from 125 watts to 2000 watts in 12 and 24-volt capacities. These small power inverters are great for smaller applications like boats, RVs, or other relatively smaller systems. In addition to the size, choosing an inverter with the right wave form is also important.

How much power does a solar inverter use?

The power of such an inverter can reach up to 8000 Watts. To determine the size of the required inverter, you need to calculate the total load of all devices in the power supply grid. To do this, measure the power of each device for 1 hour and summarize the obtained result. Hybrid inverters are most effective for solar systems.
