

Solar 35 kW inverter

Overview

What is a wit 35kW hybrid inverter?

Discover the WIT 35kW Commercial AC-Coupled Hybrid Inverter, designed for large-scale solar systems. Features 98.00% efficiency, advanced protection mechanisms, smart cooling, and IP66/NEMA 4X durability. Ideal for commercial use with global certifications and a 5 to 7-year warranty.

Can a 35kW solar array be put on an inverter?

A 35kW solar array can be put with an inverter with an AC output of 26.25kW. What you "can" do is not what you "should" do. All inverters have different specs. And based on those specs you might be able to put a LOT more panels on than the rated inverter capacity. That does not mean you should.

How big is a 35kW solar power system?

A 35kW system using 370W panels will require about 166.6 square meters of roof to be installed. Each 370W panel measures about 1.75m x 1m. 35kW solar power systems are mostly suitable for SMEs with medium energy needs. This size of solar power system is classed as "Commercial/Industrial".

How many kilowatts can a solar inverter have?

On the main grid, single-phase properties can have 5 kilowatts of solar inverter capacity, and three-phase properties can have 15 kilowatts. Off the main grid, rural properties can have 3 kilowatts of inverter capacity. Export limiting generally isn't permitted.
