

# **Solar Energy Storage in Somalia**

## Overview

---

In Somalia, access to electricity impedes economic growth and sustainable development. Despite having abundant solar energy potential due to its location near the equator, the utilization of solar energy i.

How to plan a solar energy project in Somalia?

When planning and implementing solar projects in Somalia, it is essential to consider these factors and their potential impact on the project's success. To ensure the success of a solar energy project from an economic point of view, it is essential to evaluate its financial viability and reliability beforehand.

What is the energy supply in Somalia?

Energy supply Somalia's energy capacity is around 344 MW, mainly generated from imported diesel fuel. However, some ESPs have installed grid-connected solar PV systems. In Table 3, Energy supply and tariffs in the Federal Member States have seen a 36% yearly increase in the past six years.

Which companies invest in solar energy in Somalia?

Since 2015, the most significant investment in solar energy in Somalia has been produced by leading ESPs. The companies, which include BECO, NESCOM, and Sompower, have invested in the solar system project in different capacities, with BECO producing the most significant investment in the Somali energy sector.

Can Somalia harness solar energy?

This study explores Somalia's energy profile and the potential for harnessing solar energy. The installed photovoltaic capacity was found to be 41 MW and contributed 11.9% of the total electricity generation. A case study on a solar power microgrid system in Bacadweyene, Somalia, is also presented.
