

Solar backup power supply for Porto Novo solar container communication station

Overview

What marine solar power solutions are available?

Both these marine solar power solutions include the flexible Aquarius MAS (Management and Automation System). This compact marine computer monitors the performance of a solar power array & battery pack, logs data, switches equipment on/off, calculates vessel emissions, records fuel consumption and displays system alarms.

How do marine solar panels work?

The energy collected by the marine solar panel array (s) or string (s) of photovoltaic (PV) panels can be used to power a DC load, provide a source of back-up or emergency power or be connected to an AC load via an inverter. Thus any ship, vessel or offshore platform can tap into the clean, emissions free and renewable energy provided by the sun.

Can a containerized Solar System be installed off-grid?

Off-Grid Installers have the answer with a containerized solar system from 3 kW up wards. Systems are fitted in new fully fitted containers either 20 or 40 foot depending on the size required.
