

Solar energy storage power generation by Portuguese manufacturers

Overview

Is solar power a growing source of energy in Portugal?

Solar power is a growing source in the Portuguese energy mix. Solar power contributes 6.72 TWh of generation to the Portuguese grid, accounting for 14.5% of total electric power generation as of 2024 with 5.81 GW of installed capacity. Portugal has set a goal of between 8.1 GW and 9.9 GW in installed capacity by 2030.

Will a 5 mW 20 MWh battery storage system be built in Portugal?

Galp, a Portuguese energy company, has announced plans to build a 5 MW/20 MWh battery storage system in Portugal, in collaboration with Powin. The system at one of Galp's solar plants will enable it to adjust its PV production profile and meet its energy requirements. This project marks Powin's first venture in Europe.

How much solar power does Portugal have in 2022?

Portugal's cumulative PV capacity hit 2.59 GW at the end of 2022. It aims to install 20.4 GW of solar by 2030. The country has set a goal of at least 80% of electricity production coming from renewable sources by 2050. In November, it enjoyed a weekend of being powered solely by renewables.

What does Portugal's energy storage tender mean for the energy transition?

Portugal's government has announced the outcome of an energy storage tender that will see the installation of 500 MW of energy storage capacity to support the country's energy transition. Energy storage battery. Photo by Anna Vasileva
