

Solar glass power supply

Overview

What is a glass-integrated solar cell?

AGC manufactures glass-integrated solar cells that can also be used as glass building materials. In this issue, we take a closer look at how "power generation with glass" works. Question 1 What are "glass-integrated solar cells" Glass-integrated solar cells are glass that can generate solar power in addition to basic glass functions.

What is solar glass & how does it work?

To the naked eye, the product looks just like regular glass, but with the unique ability to harnesses the power of the sun, which turns any building into an energy-generating solar array.

What is ClearVue solar glass?

Their patented technology and ClearVue PV product offer the first truly clear solar glass on the market, and available to purchase now, which promises to fill cities with buildings that actively reduce energy usage while also generating electricity to contribute to building running costs.

What is sunjoule glass?

Sunjoule contributes to the enhancement of the value of buildings and structures as a glass that pursues high design and functionality, thanks to a degree of freedom that has never before been available in solar cells. Power generation with glass. AGC's SUNJUR®.
