

# **Solar glass production resumes**

## Overview

---

What drives the solar glass market?

The growing global emphasis on renewable energy sources is a primary driver for the solar glass market, as solar glass is a critical component in photovoltaic (PV) panels used for solar power generation.

How will the Solar Photovoltaic Glass market continue to grow?

Competitive strategies range from Chinese producers expanding commodity capacity to Western incumbents investing in circularity, low-carbon furnaces, and specialty coatings. These shifts together position the solar photovoltaic glass market for resilient growth throughout the decade.

How can manufacturers defend profitability in the Solar Photovoltaic Glass market?

Manufacturers now compete on scale, logistics efficiency, and coating innovation to defend profitability in the solar photovoltaic glass market. Cumulative solar capacity reached 1.6 TWdc in 2023, up 89% on 2022, while building-integrated photovoltaics (BIPV) gained momentum.

Why is solar glass demand increasing in the construction sector?

The construction sector's shift towards green buildings and the expanding adoption of building-integrated photovoltaics (BIPV) also contribute significantly to solar glass demand.
