

Solar lamp retrofit lighting

Overview

What is a retro-fit light fixture?

A typical light fixture for a retro-fit pole is the all-in-one, which combines the light fixture, solar panel, and battery in one unit. These are quicker to install than normal solar lighting systems since they need only to be affixed to the pre-existing pole.

How do I complete a solar street light retrofit?

But maybe you are looking to be a green company, or want to reduce costs, or maybe even both. There are a couple ways you can complete a solar street light retrofit and complete both goals. The first type of solar street light retrofit system you can install would be a grid intertied system.

Can solar street lights be retrofitted?

The first type of solar street light retrofit system you can install would be a grid intertied system. Installing a solar panel on the existing poles to feed the grid during the day and then utilizing the grid power at night will help offset some costs and provide a green alternative.

What is luminous solar retrofit?

B01KQ03QOU Would you like to tell us about a lower price?

Luminous Solar Retrofit is an upgraded version of Solar charge controller which converts conventional Inverter into hybrid solar system. i.e. if you already have inverter and battery, By adding Suitable Solar Panel and Solar retrofit, your system will be converted into solar solution.
