

# **Solar panel power generation service industry**

## Overview

---

This overview of the solar power industry covers the segment of industry participants, customer segments, suppliers, value chain, industry concentration, competitive strategies, trends, and a list of companies in the industry. What is the global solar PV panels market size?

The global solar PV panels market size was estimated at USD 170.25 billion in 2023 and is projected to reach USD 287.13 billion by 2030, growing at a compound annual growth rate (CAGR) of 7.7% from 2024 to 2030.

What will drive the growth of solar PV panels industry?

Growing demand for renewables-based clean electricity coupled with government policies, tax rebates, and incentives to install solar panels is expected to drive the growth of solar PV panels industry in the coming years. Asia Pacific held the largest market share of over 54.0% in 2023.

How competitive is the global solar PV panels industry?

The global solar PV panels industry is competitive with key participants involved in R&D and constant innovation. It has become one of the most important factors for companies to perform in this industry.

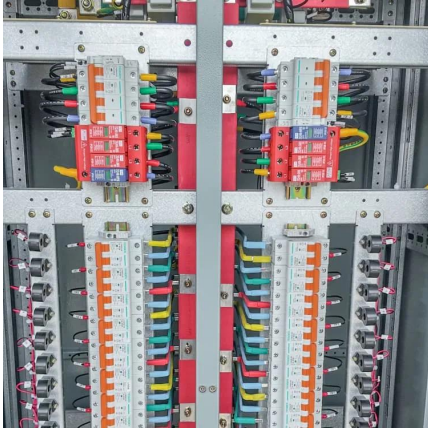

How has solar impacted global power generation?

Regarding global power generation, solar nearly doubled its share over the past 3 years, growing by 1.3 percentage points only last year to a 7% share in the world's electricity mix. This growth continued to drive renewable penetration and pushed additions of conventional electricity sources to a new low.
