

Solar power prices in San Diego

Overview

What is the cost of solar panels in San Diego?

As of August 2024, the average solar panel system costs \$2.36/W including installation in San Diego, CA. For a 5 kW installation, this comes out to about \$11,800 before incentives, though prices range from \$10,030 to \$13,570. After the federal tax credit, the average price drops by 30%. You'll probably pay even less than what we show here.

How much does a 5 kW solar system cost in San Diego?

In San Diego, CA, a 5 kW solar system costs \$11,800.

How much do solar panels cost in California?

Based on our binding quotes, solar panels typically cost between \$3 to \$4 per watt in California. You might find a lower figure elsewhere, but make sure that: The figures below are from a real quote for a 4.4 kW solar system presented to a solar.com customer in San Diego.

Are solar panels cheaper than grid electricity in San Diego?

Even without the 30% federal tax credit, the cost of electricity from solar panels is more than four times cheaper than grid electricity in San Diego. And that's just in the first year. These savings can be expected to increase each year as the cost of electricity rises.

The Amount of Electricity Your Home Uses
The Type of Solar Panels You Buy
The Quality of Your Solar Installation
Federal, State, and Local Solar Incentives
Homes that use more electricity will need more solar panels to cover their energy needs. Although solar panels do get cheaper on a per-watt basis, the overall cost of the system will increase as more panels are added. However, the higher a home's energy usage, the more solar panels can save homeowners energy bills. See more on solarreviews
