South Ossetia computer room UPS uninterrupted power supply quotation

Overview

What is uninterruptible power supply (UPS)?

For instance, when designing server rooms, they require uninterruptible power supply (UPS) systems that deliver complete power protection for critical IT applications. These components must also be able to accommodate growth and expansion while maintaining cost-effective performance.

What is an ups & how does it work?

UPS - uninterrupted power supplies to power computers and laptops. Note: UPS are temporary "switch-over" solutions that provide power for 5 to 15 minutes (100% load). UPS beep during a power failure. An inverter is required to power devices for an extended period of time. Note that continuous power cuts will shorten battery life.
